OBJECTIVE

Aspiring Software Engineer in search of an internship during summer 2023.

EDUCATION

Allegheny College, Bachelor of Computer Science   2020-2024

Relevant Classes: Database Systems, Web Development, Software Engineering, Discrete Structures and Algorithms, Data Abstraction, Computer Organization.

North Allegheny High School   2016-2020

SKILLS

Languages:	Python, C, SQL, HTML, CSS, JavaScript
OS/Platforms:	Linux, GitHub, GitFlow, Mac OS, Windows
Tools:	Docker, Hugo, Poetry, Pytest, and DB Browser
Soft Skills:	Verbal communication, teamwork, problem solving, and organization

PROJECTS

Contributor - GatorGrade: Worked with a team to create a Python tool that executes an automatic grading tool used by all faculty at Allegheny College. Collaborated with fellow developers to produce sustainable software design. Contributed to source code, made pull requests, added documentation, and conducted code reviews.

California Housing Prices: Gathered data of the housing market in California in 1990. Created a database using SQL which helped store the data into different variable characters. Connected the database to a Python program which serves as a interface. This interface then prompts the user for input, then relays information from the database.

EXTRA-CURRICULAR ACTIVITIES

- Member of the Allegheny College Football team.

- Received NCAC Second-team All Conference award after the 2021 season for outstanding athletic performance.

- Interests: Weightlifting, Hiking, Traveling
